ATF Professional Line Machine

- Uncomplicated maintenance contracts
- Large number of adapter units
- Quick supply of replacement parts
- Provision of replacement device at no charge if defective
- Individual financing plans (immediate purchase/instalment purchase when ordering oil/leasing purchase over 2 years)
- Quick, competent support

The system offers the following additional information (added value):

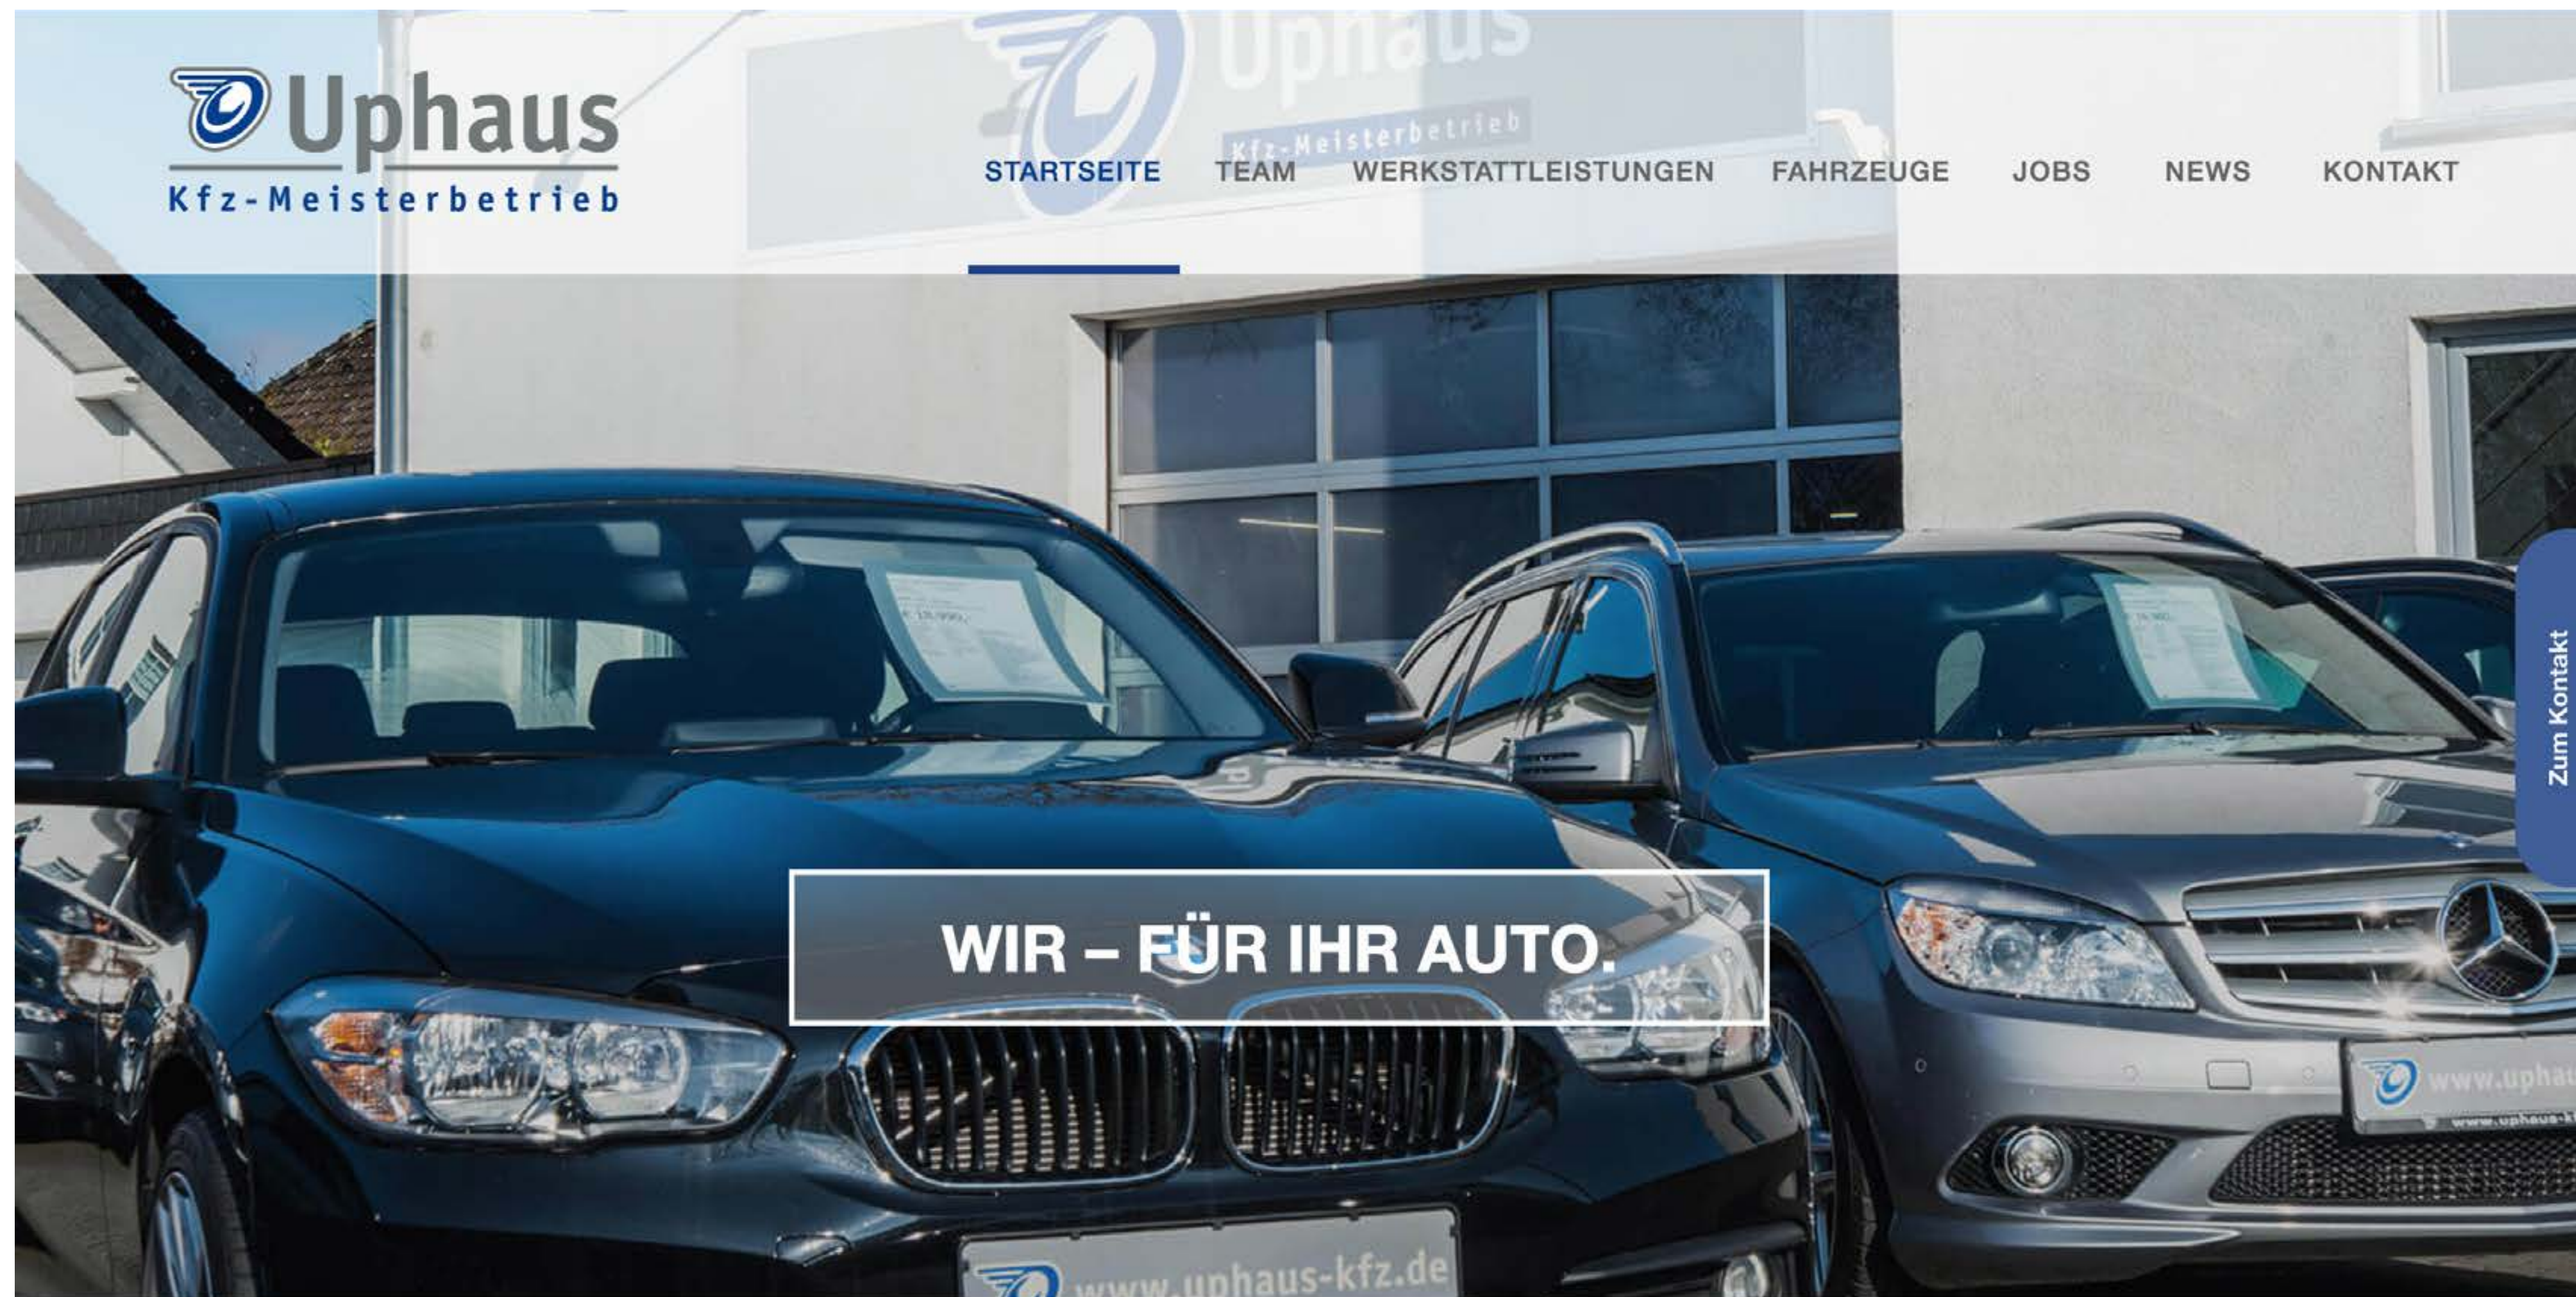

1. Which adapter do I require?
2. Checklist (procedure for oil changes)
3. Technical drawings and adapter connection.

Exclusive local sales

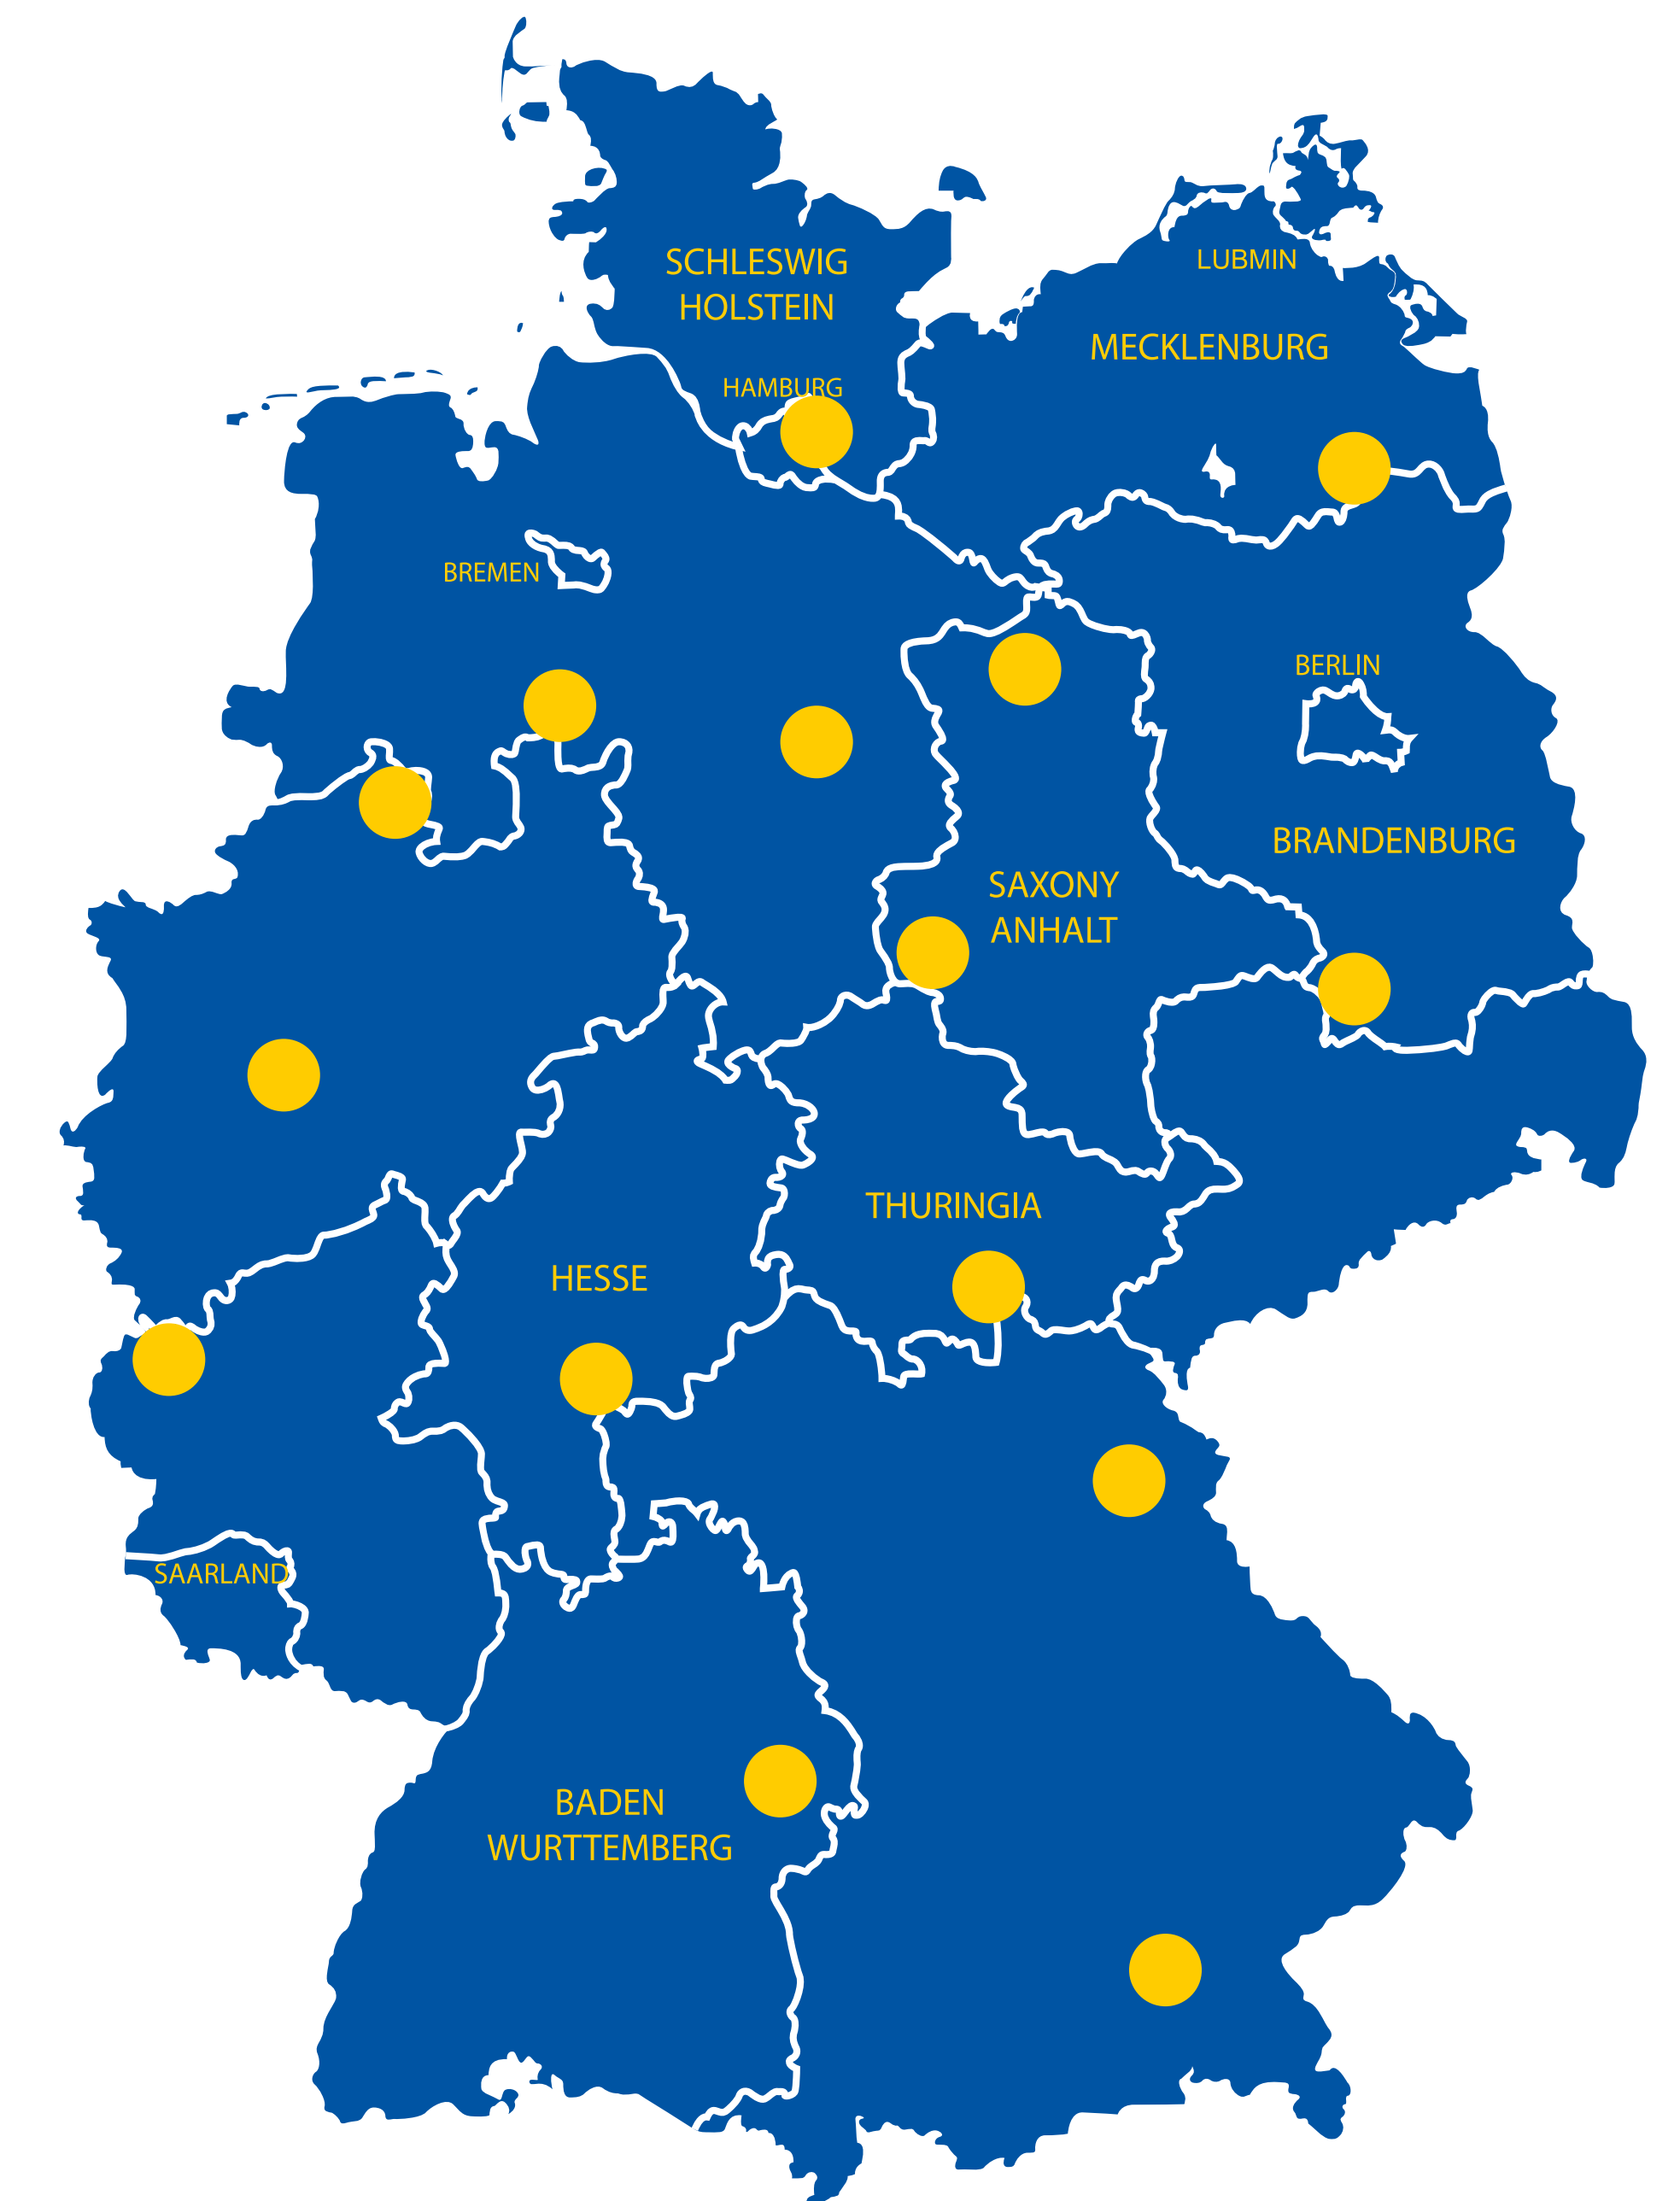

RAVENOL®

Exclusive sales for your workshop in the designated area

Marketing and customer acquisition for your workshop via the RAVENOL network (website, Facebook etc.)

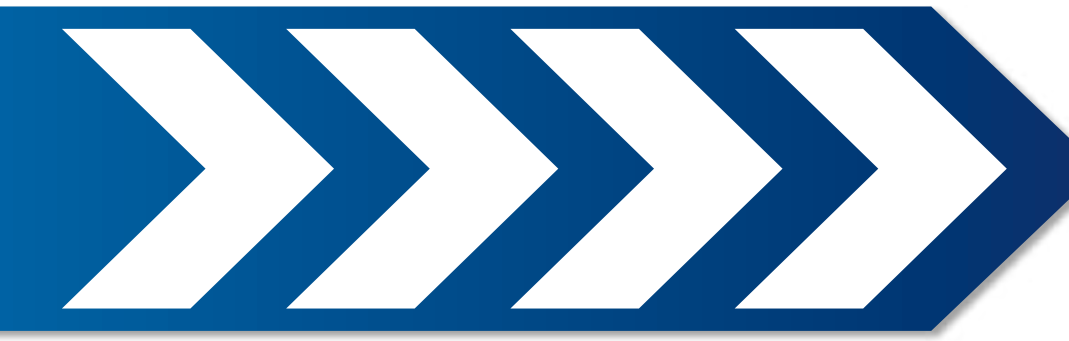

Prizes or monetary bonuses through simple advertisements such as (ATF Professional Partner, RAVENOL ATF Professional Partner, etc.)

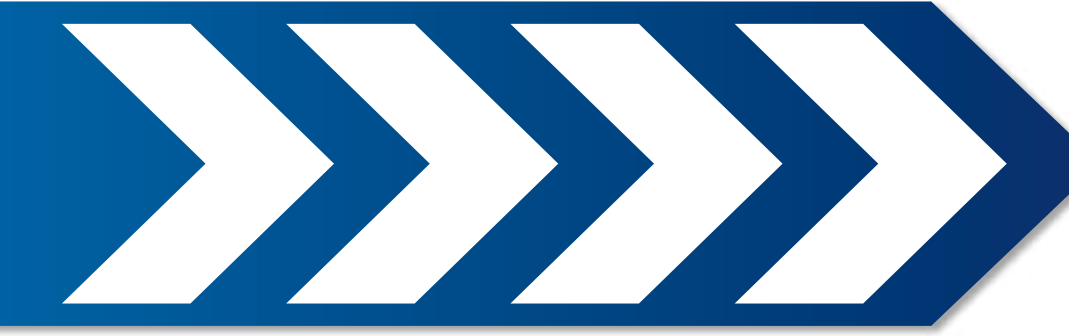

“RAVENOL ATF Professional Partner”+ emblems

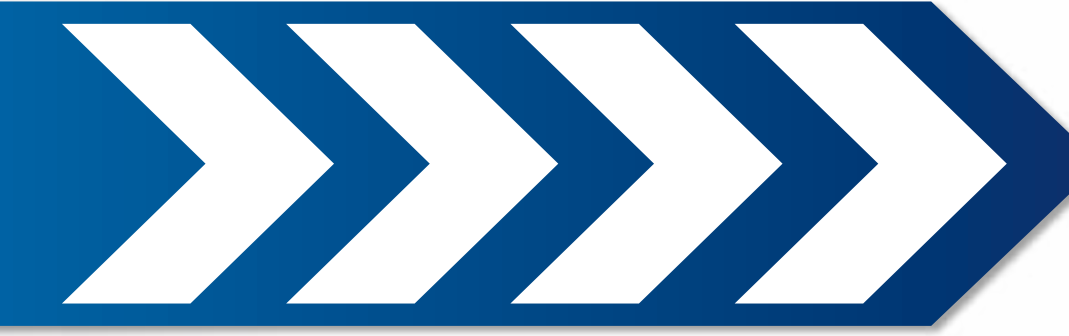

Benefits:

- High-quality EU metal processing
- High unladen weight ensures the stability of the machine
- Practical drawer
- Large storage capacity within the device
- Includes various special adapters which would give rise to high additional costs with other manufacturers
- Wide range of adapters
- Quick and simple flow direction control
- Constant development of new adapters
- Efficiency increase with detailed instructions through Haynes Pro

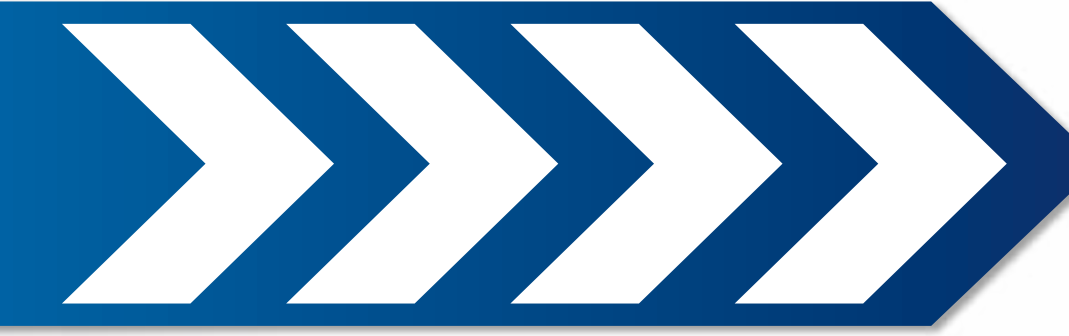

- Precise measurement of the oil quantity through a weighing system which can be calibrated
- Security circuits to avoid unwanted backflow of waste oil
- High pressure performance and throughflow for rapid and trouble-free operation
- Colourful touch display can also be operated using gloves
- Extensive database including density data of RAVENOL oils
- Various flushing modes for oil or additives
- Easy to switch the containers for waste oil and fresh oil
- The machine can be used almost anywhere in the ATF circuit

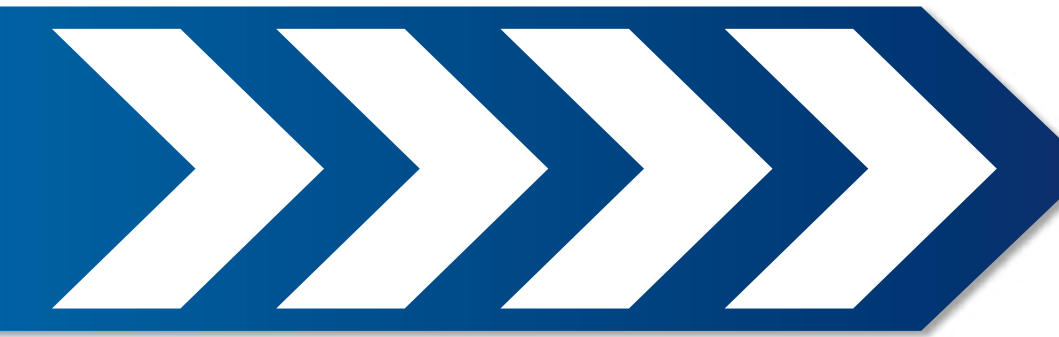

ATF

- 1 - Upper part of the casing
- 2 - Colour touch screen
- 3 - Drawer with available adapters
- 4 - Control lamps - status display of the device
- 5 - Thermal printer
- 6 - Openings for optically monitoring the ATF levels in the containers
- 7 - Lockable wheels

ATF

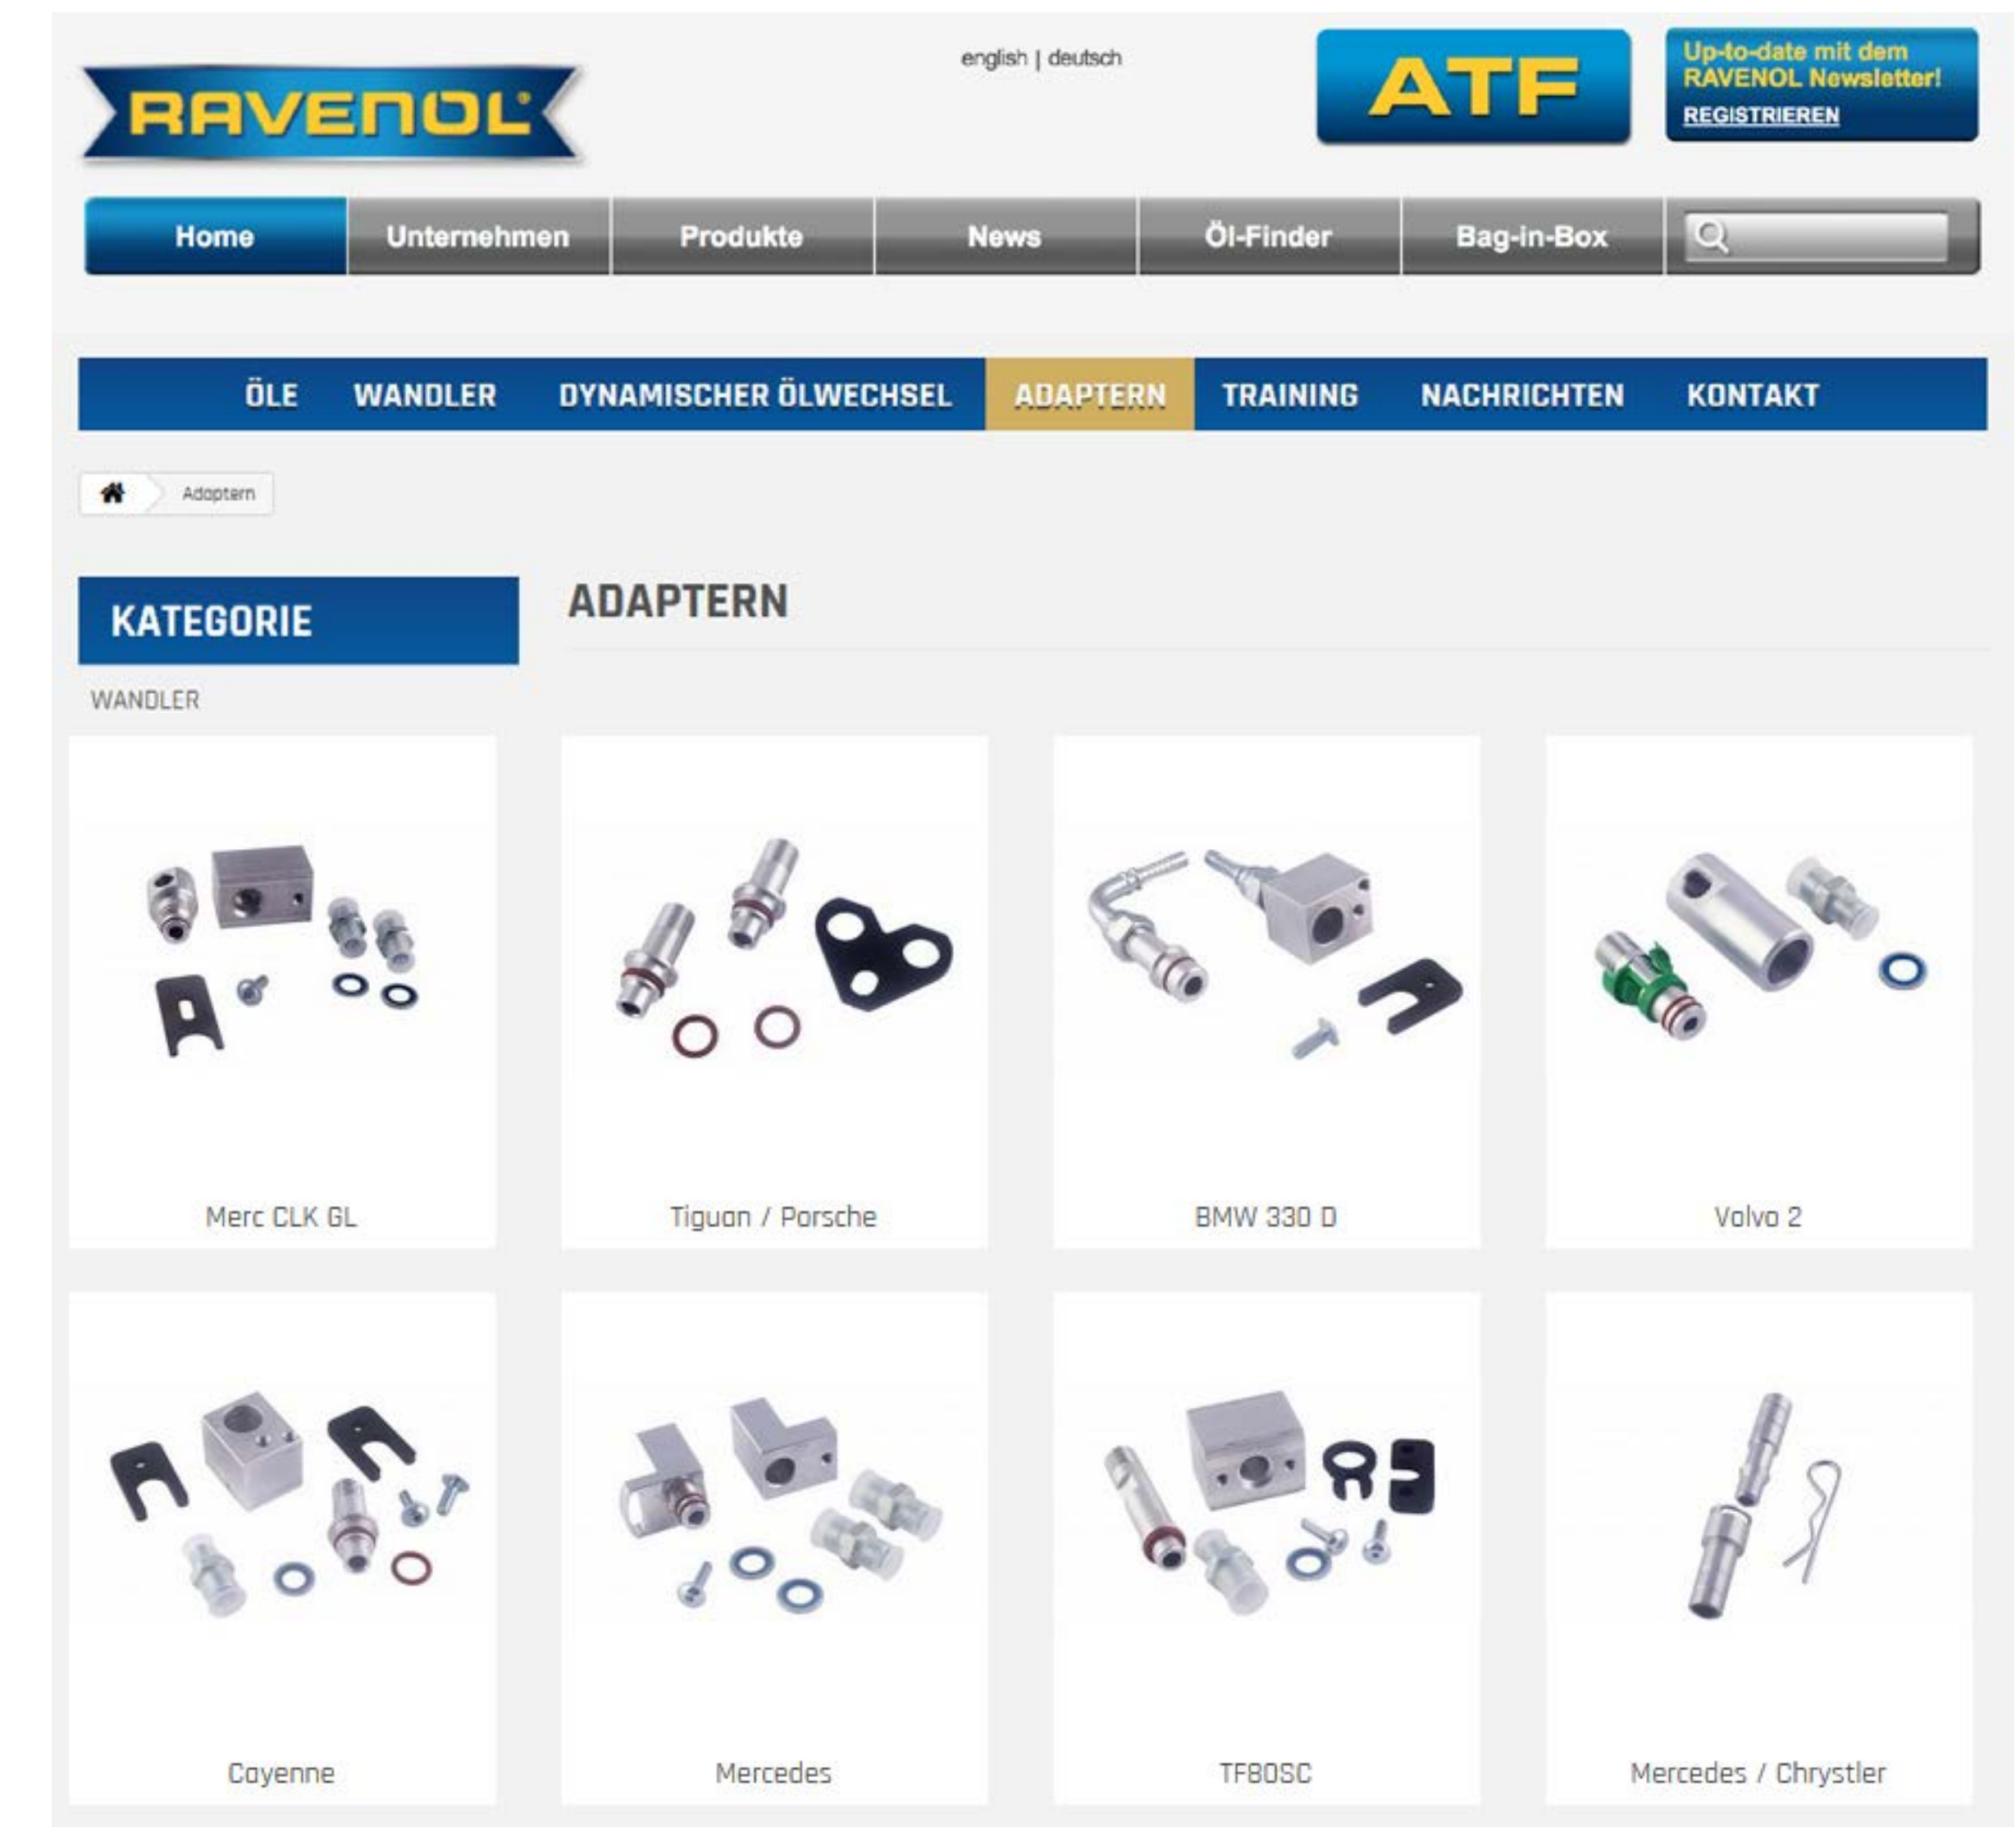

- 8 - Name plate
- 9 - Connection cable transmission device
- 10 - Colourless connection cable - to the device (incoming ATF from the transmission)
- 11 - Hose to the container for the old ATF
- 12 - ATF filter
- 13 - Suction hose for the new ATF/suction head
- 14 - Weighing scale for the new ATF
- 15 - Weighing scale for the old ATF
- 16 - Overflow pipe

ATF

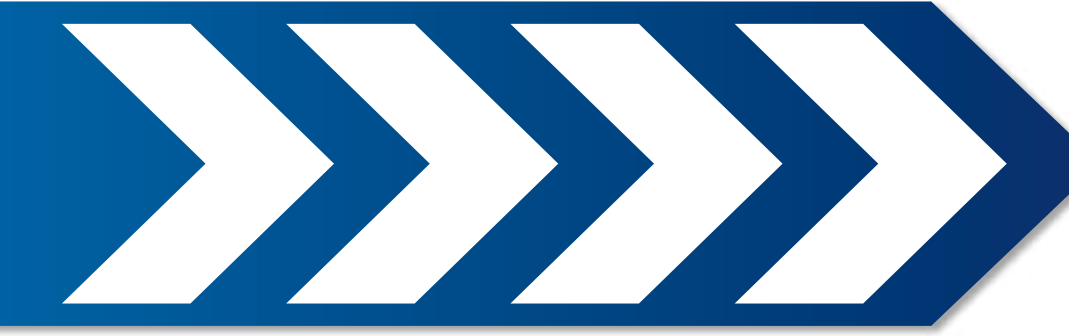

- 1 – DPO, seal, assembly screw, connection pieces
- 2 – DSG, connection pieces
- 3 – Powershift, MPS6, 6DCT 450, connection pieces
- 4 – AW55-50, seal, connection pieces
- 5 – spacer elements for DPO and AW55-50
- 6 – Universal plug connector Ø 9 - 19 mm
- 7 – Universal plug connector Ø 9 - 19 mm
- 8 – Quick connections
- 9 – Short installation holders for universal plug connectors
- 10 – Long installation holders for universal plug connectors

In addition a rubber hose set and hose clamp set.

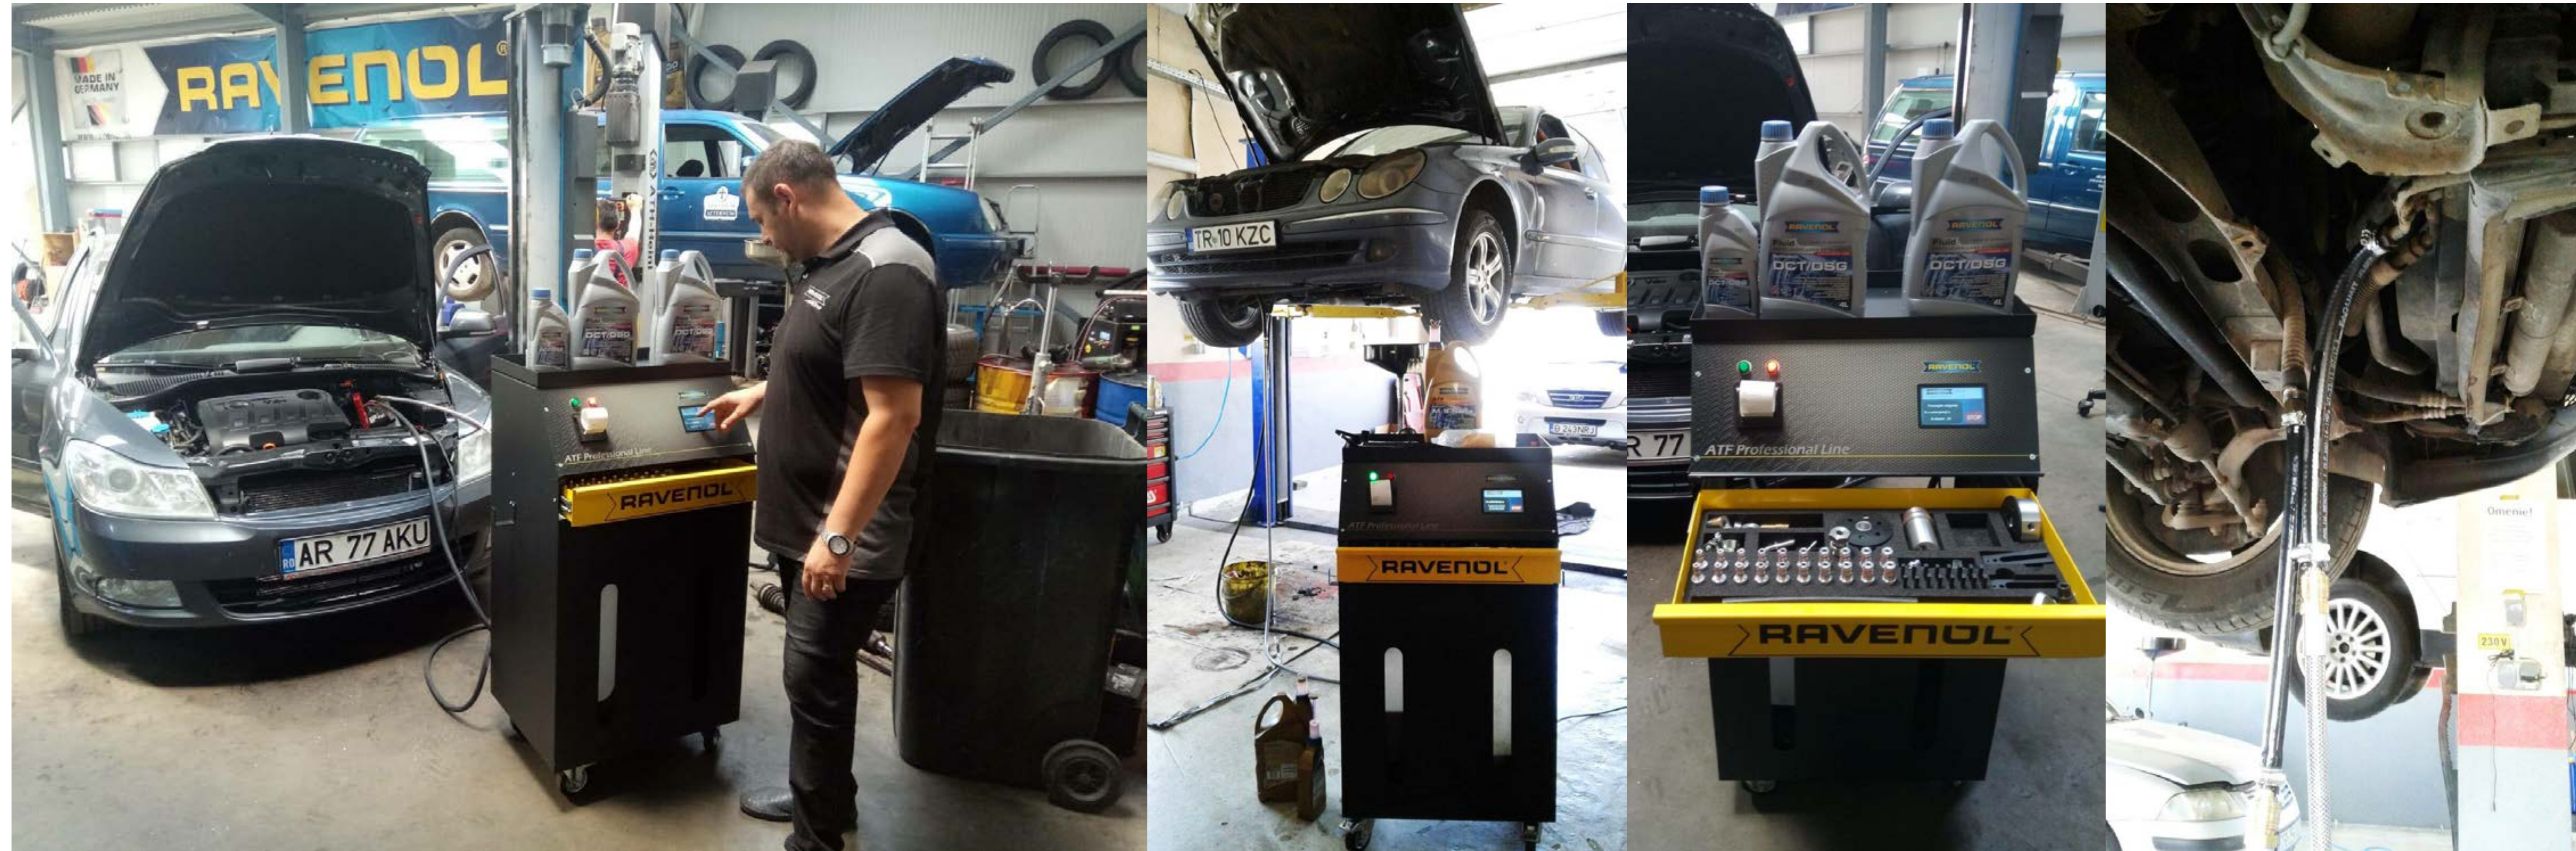

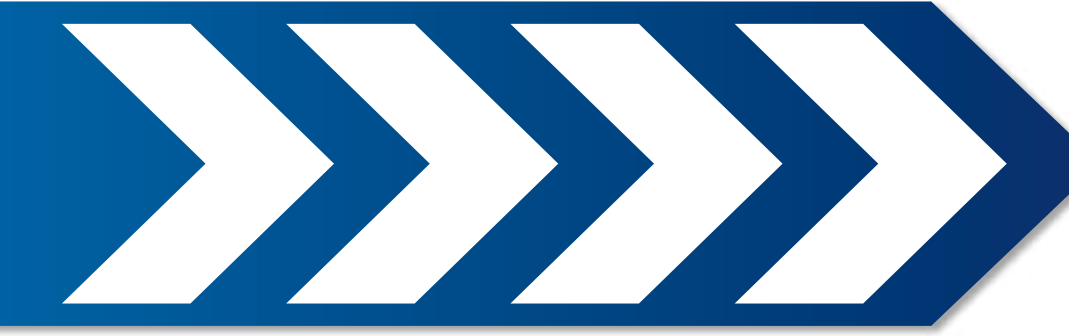

ADAPTER SETS

Replacement parts, adapters and accessories
www.ravenol.de

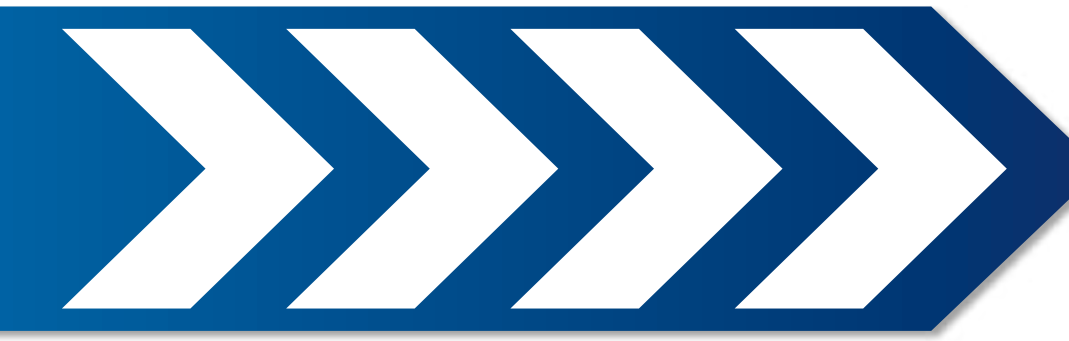

- If used automatic oil is not changed, it may lead to foam formation and oil sludge in the transmission, which may lead to transmission jerking, circuit disruption or problems with power transmission
- When simply changing transmission oil, only a small proportion of the waste oil is left
- When used dynamically with the help of the ATF machine, the transmission is flushed through and waste oil is eliminated with no residue

RAVENOL Transmission Service

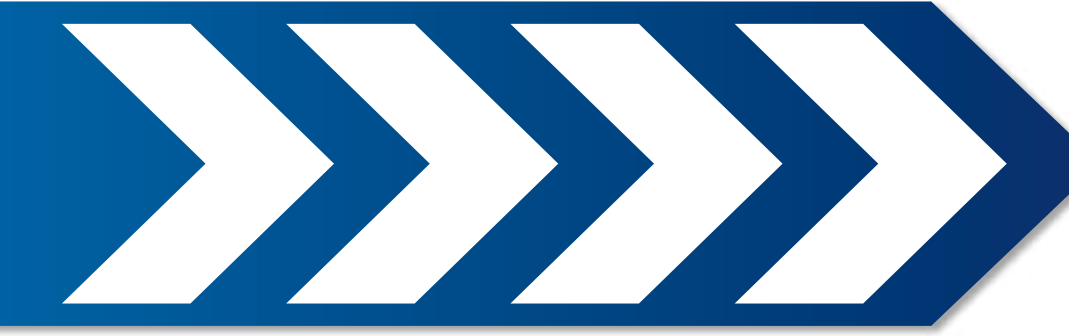

You will receive more favourable terms and conditions as a result of promotional displays:

- Cost-efficient procurement of the ATF machine
- Subsidies for advertising costs
- No surcharges on ATF, work clothing etc

Product training sessions

- Product training sessions! – internal RAVENOL experts, online too
- Training sessions for customers on site or here at Ravenol

- **TRANSMISSION CLEANED**
- **PERFORMANCE IMPROVED**
- **NO RESIDUES OF WASTE OIL IN THE TRANSMISSION**
